Use of Electude at Emery Collegiate Institute

By: Ravi Mohan, Transportation Technology Teacher

My name is Ravi Mohan and I am the transportation teacher at Emery CI. I want to share my experience in regards to the Electude program with you.

I first learned about Electude at last year's Skills Canada at Rim Park. What caught my attention was how interactive and well developed it was for our SHSM students heading to Centennial College.

I had the opportunity to use this program with my students on a trial run for a few months. The results were better than expected as students began to ask me to assign them more work than what I have given them to do as home work from a text book. With this program students are more engaged because it's most interactive and students have a better understanding of the principles and operations of any part of the vehicle.

One of the first lessons I tried with my class was the 4 stroke cycle engine (concept, principles and operations). The program began with general knowledge, operations of each cycle.

At the end there are questions students can answer right

away and they know they answer it correctly. At the same time I am able to see their score as they move along, additionally it tells how many times they answer correctly or incorrectly.

I can able to track students' progress as the move along different modules.

Since we are moving more in the technology age and our Board is heading in that direction, the feedback I got from students is that they feel they are better prepared using this technology.

Additionally most of our students are in the SHSM Transportation program who is heading to Centennial College as apprentices said that they are using this program as part of their training and they found it to be very helpful.

I strongly believe it is important to have this program (Electude) for our students to assist them and to accommodate their learning needs.

The Best Full Featured E-Learning Solution for Service Automotive Technician Training that truly Engages Students and Helps them gain Knowledge
